MOUTON (Linguistics)						
	<p style="text-align: center;">Cognitive Linguistics Research [CLR]</p> <p>COGNITIVE LINGUISTICS RESEARCH offers a forum for the presentation of research within the perspective of cognitive linguistics. This rubric subsumes a variety of concerns and broadly compatible theoretical approaches that have a common basic outlook: that language is an integral facet of cognition which reflects the interaction of social, cultural, psychological, communicative and functional considerations, and which can only be understood in the context of a realistic view of acquisition, cognitive development and mental processing.</p>

	<p style="text-align: center;">Handbücher zur Sprach- und Kommunikationswissenschaft / Handbooks of Linguistics and Communication Science (HSK)</p> <p>HSK illuminates a field which includes general linguistics and the study of linguistics as applied to specific languages and more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. Published in German, English and French.</p>

	Studies in Generative Grammar [SGG] The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century. This branch of linguistics, broadly known as Generative Grammar, is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the 'language organ'. The STUDIES IN GENERATIVE GRAMMAR series comprises high quality monographs and collected volumes that address such issues.

	Studies on Language Acquisition [SOLA] Language acquisition is a human endeavor par excellence. As children, all human beings learn to understand and speak at least one language: their mother tongue. It is a process that seems to take place without any obvious effort. Most people, however, know more than one language. Children may have become bilingual in early childhood; adults may have become more or less fluent in a second language, either by using it in everyday communication or by formal instruction in the classroom.

	Topics in English Linguistics [TiEL] The future of English linguistics as envisaged by the editors of Topics TOPICS IN ENGLISH LINGUISTICS lies not in ever more detailed studies on ever more phenomena, but in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand, and comparative linguistics on the other.

	Trends in Linguistics. TRENDS IN LINGUISTICS aims at providing a comprehensive forum for publications in Linguistics covering the entire range of language, including its variation and variability in space and time, its acquisition, theories on the nature of human language in general, and descriptions of individual languages. The series is especially interested in publications addressing the state of the art of Linguistics as a whole or of specific subfields, and in publications that offer challenging new approaches to Linguistics.
